

iEnvision Datavision®

Does this sound familiar...

You are already enjoying working with the industry standard #1 desktop publication management system to help gather the information you need to be able to report on your publication plans?

Your publication management system provides you with the holistic view you need, so you can understand what's going on across your global and local markets?

You're able to provide your medical affairs colleagues with the information they need about your publication plans?

Your publication planning couldn't get any easier could it? Or could it??...

Welcome to the world of iEnvision Datavision

The new industry standard in publication planning and management builds on our industry-wide experience as the publication management system of choice, with updated functionality and benefits of the iEnvision platform.

Envision Pharma Group has been providing the industry standard #1 publication management system since 2004. Our technology solutions are used by 19 out of the top 20 global pharmaceutical companies every day.

Adding value to your organization

Development of high-quality, comprehensive publication plans

Wizard-based functionality generates a baseline tactical plan for approval, gap analysis, amendment, and project generation

Supports Good Publication Practice guidelines (GPP3) and company standard operating procedures (SOPs)

Global and local adherence to internal and external guidelines via workflow automation, field/data validation, and checklists

Strategically planned data dissemination

Supports purposeful planning and team consensus as well as financial management of plan and projects

Efficient execution of publication activities, reducing revisions, and plan slippage

Quick access to tasks and in-system document reviews and approvals, workflow automation, and field/data validation

Clear audit trail of publication activity

Auditable trail of reviews, approvals, and author involvement

Publications align with key medical objectives

Platform-level connectivity with other iEnvision medical affairs solutions and modules

Reduce reliance on agencies: track and access projects

Generate consistent metrics, present summaries in dashboards, answer typical publication questions via the portfolio search

Alignment across global and local teams

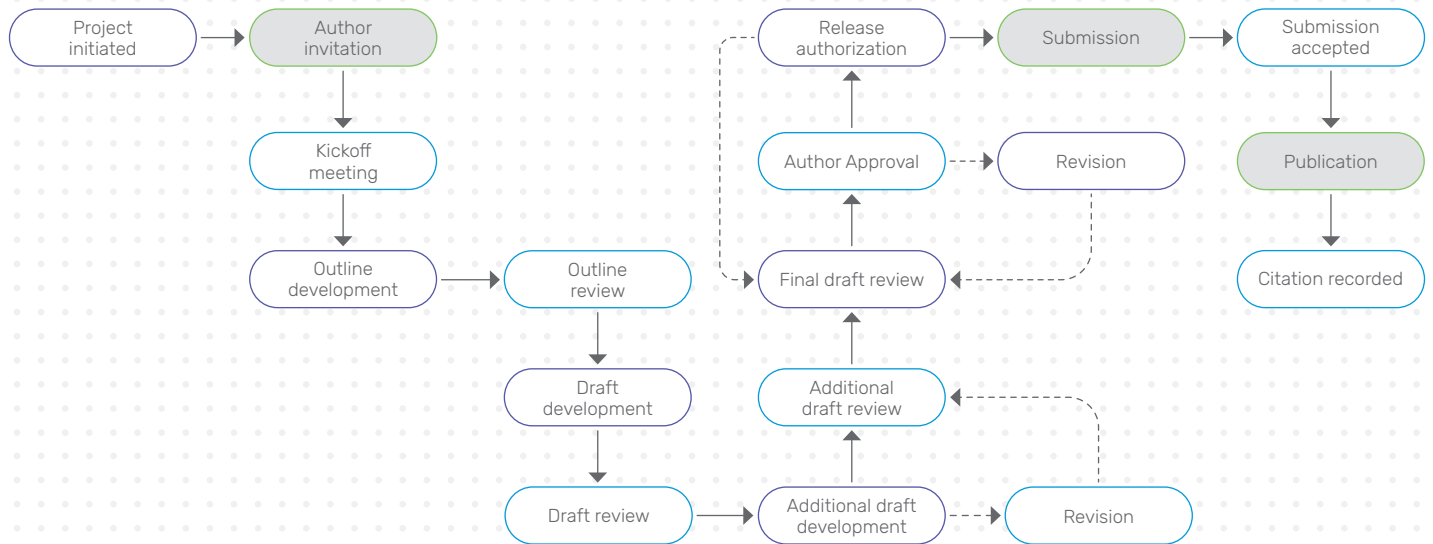

Checklists and validation checks ensure compliance with SOPs and working practices

Global transparency and consistent management of publication programs

Checklists and validation checks ensure compliance with SOPs and working practices and consistency across the enterprise

Datavision workflow

Helping your business achieve its publication planning goals

iEnvision – The global medical affairs platform

The rapidly evolving medical affairs functional landscape and its growing importance within pharmaceutical companies is accompanied by an increasingly complex world of stakeholder and partner interactions, connections, and compliance requirements.

iEnvision is an advanced software platform supporting medical affairs-led business transformation, operational excellence, and connectivity – purpose-built to help strategically plan and manage medical evidence generation, grant programs, and communication activities.

IMPROVES EFFICIENCY
