

iEnvision[®] Library

Does this sound familiar...

You have outdated, or inappropriate, documents available for use across your organization via a shared drive?

You're frustrated by the lack of control you have over who has access to these documents?

You often waste time manually uploading your approved documents into numerous other systems?

Communications solutions – Library

The solution for supporting enterprise-wide sharing of approved scientific materials

If you're feeling the burden of managing and sharing your "approved for use" content across your organization, especially as your library of materials is only going to continue to grow, be assured there is a solution to your problem!

We understand the importance of the timely, effective, and efficient management and sharing of published and other approved scientific materials.

Envision Pharma Group has been providing purpose-built solutions to support enterprise-wide sharing of approved scientific materials since 2015. Our technology solutions are used by 19 out of the top 20 global pharma companies every day.

Adding value to your organization

Find the latest approved materials quickly

Powerful, intuitive, facet-driven search facility

Appropriate, and consistent enterprise-wide sharing of materials

Access to materials can be given based on role and location

Materials usage metrics

Track how often a piece of material is downloaded and by whom

Stay up-to-date on areas of interest

Save and share searches, bookshelves, reading lists, and subscribe to update notifications

Ensure currency and appropriateness of materials

Integrated workflows for approvals, embargoes, expiries, and retirements

Integration with Altmetric and Scopus

View and access post-publication metrics from Altmetric and citation counts provided by Scopus

Timely sharing of published and other approved scientific materials

Easy to add content manually or via automated feeds from iEnvision solutions and third-party tools

Enforce company document compliance

Allows assignment of document rules by a librarian

Ensure best information available

Focused knowledge base and repository of medical affairs' "approved for use" content

Library workflow

Helping your business achieve enterprise-wide sharing of approved scientific materials

iEnvision – The global medical affairs platform

The rapidly evolving medical affairs functional landscape and its growing importance within pharmaceutical companies is accompanied by an increasingly complex world of stakeholder and partner interactions, connections, and compliance requirements.

iEnvision is an advanced software platform supporting medical affairs-led business transformation, operational excellence, and connectivity – purpose-built to help strategically plan and manage medical evidence generation, grant programs, and communication activities.
