

# iEnvision<sup>®</sup> Medical Education

## Does this sound familiar...

You are spending an increasing amount of time gathering the information you need to be able to report on your medical education grants because your systems do not do what you need them to?

You would love a holistic view of your medical education grants, but all the information is not easy to access to truly reflect on the full picture?

Your medical affairs stakeholders are increasingly asking for visibility of your medical education grants and outcomes, but providing them with the information they need certainly isn't easy?

## Grant solutions – Medical Education

### *The solution for the management and tracking of requests for medical education grants*

As your portfolio of medical education grants continues to expand, and the landscape continues to change, you need a system that can keep up with you.

We understand the importance of being able to manage your diverse medical education portfolio with transparency and compliance.

Envision Pharma Group is an industry leader within the grants area and has been supporting pharmaceutical companies' grant programs since 2007. Our technology solutions are used by 19 out of the top 20 global pharmaceutical companies every day.

## Adding value to your organization

### Save time

Web portal collects all required data at the appropriate time, reducing the need to request or find additional information

### Strategic alignment and elimination of redundancies

Allows visibility of all grant requests from submitted through to closed, and outcomes submitted by an organization

### Effective high-level grant management

Ability to align projects to medical objectives/strategies to determine gaps and report appropriately

### Progress projects efficiently

An intuitive menu of actions that is dynamic and changes as the grant progresses, so that you immediately know what needs to be done next

### Confidence in compliance with the ability to investigate queries

Documentation of reviews, reconciliation, and close out processes with full audit trail of all changes and organization checks

### Quick access to key outcome metrics

Key performance indicators are visible on real-time dashboards (eg, number of submissions, approval rate, financial summary, grants by status)

### Ensure all relevant steps in your project are covered from day one

A standardized workflow in line with industry standards and can be configured to a company's standard operating procedures (SOPs)

### Confidence in compliant project progression

Checklists that ensure adherence with company SOPs and working practices

### Ensure the currency and accuracy of your reported information

Ability to filter and develop real-time ad hoc reports

## Medical Education workflow

### Helping your business achieve its medical education goals

Metrics reporting is possible at all times throughout the life cycle of the grant

## iEnvision – The global medical affairs platform

The rapidly evolving medical affairs functional landscape and its growing importance within pharmaceutical companies is accompanied by an increasingly complex world of stakeholder and partner interactions, connections, and compliance requirements.

iEnvision is an advanced software platform supporting medical affairs-led business transformation, operational excellence, and connectivity – purpose-built to help strategically plan and manage medical evidence generation, grant programs, and communication activities.

- Reduce internal support and training needs
- Complete processes in a timely manner
- Achieve seamless collaboration

- Align processes with industry standards
- Create auditable project records
- Maintain visibility and governance of both global and local activities

- Identify gaps in evidence
- Achieve organizational goals
- Align medical and communication plans with strategy
